We invite you to review the ClearMirror product family on NewHome Bath and Mirror's website at: www.clearmirror.com, so you can see ...

The Difference is Clear.

See Your Way Clear ... To Luxury, Convenience and Safety

Today's bathroom trends, featuring high-powered, multi-stream shower heads, jacuzzis, saunas and steam baths, certainly provide added pleasure and convenience. They also add even more moisture into bathrooms. Let NewHome's line of new construction and do-it-yourself products help make the transition complete!

In fact, from the moment your bath light is turned on, bathroom fog is no longer a bother. The NewHome ClearMirror™ or MystFree ClearMirror™ from NewHome Bath and Mirror immediately defogs your bathroom mirror and keeps it that way! Now you can have a clear view of things without a chill or embarrassment from having to open the bathroom door! And ClearMirror products are safe to the touch.

Imagine how much easier and more enjoyable this will make your daily grooming routine. No more towel and hand streaks on the mirror; no more frustration resulting from peering through the steam to make sure your razor—or your makeup—is in the right place. All you get is a deserved retreat into luxury and convenience.

... Added Benefits of a NewHome Fogless Mirror System!

SAFETY:

UL listed. Advanced technology heating elements are safely imbedded within the ClearMirror pad. The low surface temperature will not damage mirrors, doors or walls.

ECONOMY:

ClearMirror uses the same amount of electricity as a standard light bulb. Wired to the bathroom light switch ensures it will not be left on.

SIMPLICITY:

Detailed and easy-to-follow instructions result in simple installation, with only the most basic tools and skills required. Also, online installation help is offered through our FAQ page on our website.

RELIABILITY:

The UL listing of a ClearMirror is specific to bathroom applications and conditions. The design of the heating element has successfully met demanding industrial applications for over 20 years and is produced under ISO 9000 quality standards.
